

How do I share my PDF record using the Docket[®] app?

Need to share your personal and/or family immunization record PDF(s) for back-to-school, day care, college, a new job, or something else? Follow these simple instructions.

1. Tap the share button.

The standard share button (labeled “PDF”) appears next to your name on the Immunization Records screen. It is represented by a box with an arrow.

3. Select the check mark.

After your PDF download is complete, tap the check mark in a green circle to share your official record. You can share using OS-standard functionality. If you received a new shot, tap “Update PDF.”

2. Download PDF.

Tap “Download PDF” next to the immunization report you would like access. Please note that PDFs often take some time to download. This is normal.

Where is Docket[®] supported?

Docket[®] is available to residents of Alaska, Idaho, Maine, Minnesota, New Jersey, North Dakota, Utah, and Wyoming. Coming soon to more states.
